If Respondent resides in California and is considered to be in non-practice, Respondent shall comply with all terms and conditions of probation. All time spent in an intensive training program which has been approved by the Board or its designee shall not be considered non-practice and does not relieve Respondent from complying with all the terms and conditions of probation. Practicing medicine in another state of the United States or Federal jurisdiction while on probation with the medical licensing authority of that state or jurisdiction shall not be considered non-practice. A Board-ordered suspension of practice shall not be considered as a period of non-practice.

If Respondent violates probation in any respect, the Board, after giving Respondent notice and the opportunity to be heard, may revoke probation and carry out the disciplinary order that was stayed. If an Accusation, or Petition to Revoke Probation, or an Interim Suspension Order is filed against Respondent during probation, the Board shall have continuing jurisdiction until the matter is final, and the period of probation shall be extended until the matter is final.

16. **LICENSE SURRENDER.** Following the effective date of this Decision, if Respondent ceases practicing due to retirement or health reasons or is otherwise unable to satisfy the terms and conditions of probation, Respondent may request to surrender his or her license. The FDA black box warning provides that “Acetaminophen has been associated with cases of acute liver failure, at times resulting in liver transplant and death. Most of the cases of liver injury are associated with use of the acetaminophen at doses that exceed 4,000 milligrams (4 grams) per day, and often involve more than one acetaminophen containing product.”

Respondent did not discuss with Patient A and/or failed to document having discussed with Patient A non-opioid treatment options. Respondent failed to discuss with Patient A and/or failed to document having discussed with Patient A risks and benefits of opioid treatment. Respondent did not conduct regular drug testing or take other measures to monitor misuse or abuse by Patient A.

Patient A claimed that he lost his Norco medication a couple of days earlier and brought in additional medications he had been taking, including, Lamotrigine\(^8\), Divalproex\(^9\), Risperidone\(^{10}\), Sertraline\(^{11}\), and Felodipine\(^{12}\). Respondent refilled all of these medications.

11. On or about March 1, 2016, Patient A returned to Respondent. Patient A requested an increase in the dosage of Norco to 10-325 mg. Without documenting why Patient A wanted a higher dose, Respondent prescribed the increased dosage.

16. On or about April 20, 2018, Patient A returned to Respondent. Patient A presented with chief complaint of medication refill. Without any explanation, Respondent documented a diagnosis of stimulant abuse. Respondent refilled Patient A’s Norco prescription, but decreased the dosage to 7.5-325 mg.

17. Respondent did not have a pain management agreement with Patient A. Respondent failed to have and/or failed to document having a treatment plan for Patient A. Respondent failed to discuss and/or failed to document having discussed with Patient A and/or Patient A’s family risk of opioid overdose. Respondent failed to adequately review and monitor efficacy and adverse events from ongoing opioid treatment: Respondent’s documentation of Patient A’s visits contains sparse information about Patient A’s pain levels, functionality, or overall progress. Respondent failed to adequately manage the medications he prescribed to Patient A, by among other things, ordering insufficient laboratory testing during the two-year treatment period (2016-2017), failing to adequately monitor Patient A’s kidney and liver function, and failing to determine why Patient A was initiated on the opioids that Respondent refilled. Respondent demonstrated inadequate awareness of the need for pain management contracts, review of CURES reports, and regular laboratory testing.

18. Respondent prescribed the following medications to Patient A:
